Global Edition 2023

Headquarter of ZC Rubber

- ◎ A Company established in Year 1958
- ◎ No. 1 Tyre Manufacturer in China
- ◎ No. 8 of Top 75 Global Tyre Manufacturers in Year 2021
- ◎ Sale revenue reached USD4.528 billion in Year 2021

Zhongce Rubber Group Co., Ltd. (ZC-RUBBER) takes great pride in producing tyres that rate among the best in the world. Our corporate philosophy is all about collaboration with our suppliers, with over 10,000s of companies who sell our products around the world, and with our millions of end customers who trust our tyres every single day.

Our engineers are working together closely with our international Research and Development (R&D) team combined of Japanese and Korean experts. We keep on investing millions of US dollars in establishing various production and testing facilities. Meanwhile the quality control system approved by global tyre manufacturers and international vehicle manufacturers will guarantee the safety and quality of ZC-Rubber tyres.

Today ZC-Rubber is expanding from a Chinese Oriented company to a global tyre manufacturer. The subsidiaries located in Southeast Asia, North America, South America and Europe are serving customers without any difference of time and language. The plant in Thailand produces suitable products for local and nearby markets. Safe and value will be the keys supplied by ZC-Rubber, who will craft a better future together with partners and friends all over the world.

# BASIC TIRE STRUCTURE

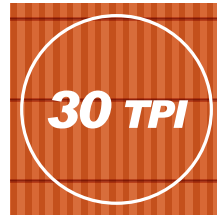

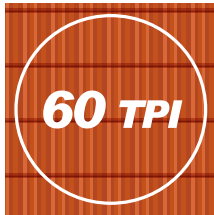

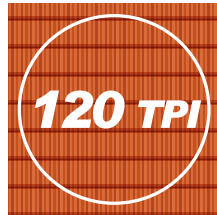

# WRE - WIDE RIM EDITION

The wide range of rim width on the market cannot be covered any more by one tire construction only. The new wide rim edition (WRE) optimizes the tire construction to the latest rim developments. Designed for 30mm wide rims the new 2.3 wide PHANTOM tires have been proven to work best over a range from 28-30mm inner rim width. Riders who run 20-25mm wide rims get the best performance with the 2.2 version of the PHANTOM tires.

# CASING

TPI=Threads Per Inch(2,54cm)

- lower TPI casing is heavier, but it can give better cut, puncture, and abrasion resistance
- High TPI casing is lighter, and offering a smoother and comfortable ride feeling

**ARAMID**  
Aramid-bead is a kind of composite strong and light weight fabric, used especially on folding tire. Aramid stays tightly to the rim, while offering easy installation and portability.

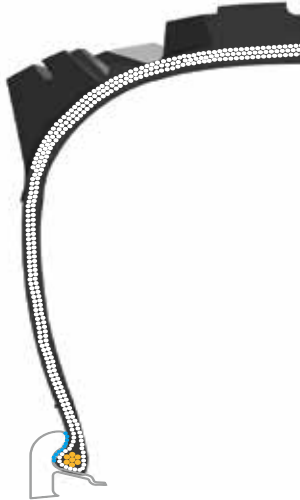

**WIRE**  
In applications where ultimate strength is needed and transportation is not a factor, a copper-clad metal material circled in a particular way is utilized as bead wire. The bead is to keep the tire mounting the rim tightly while the tire is inflated.

# TUBELESS READY

Tubeless provide the benefits of less chance of flatting since there is no tube, and lower rolling resistance when compared to a tube-type tire. The constructure with extra-strong foldable bead and reinforced rubber sidewalls is mainly used for Elite and performance lines.

## TREAD PROTECTION

★★★★★

Protection Grade

The best solution for anti-punctures, it is double protection for the tire. An extremely closed meshed and dense fabric (Kevlar3) always used for flack jacket placed under the tread.

★★★★★

Protection Grade

A layer of **5mm thick**, special high elastic rubber, most effective protection breaker for bicycle tires, even a thumbtack won't harm it. Usually used in city/urban tires application.

★★★★☆

Protection Grade

The upgrade edition of SHARK SKIN, using **40X40 Nylon Canvas** as breaker material, provide super puncture and tear resistance.

★★★★☆

Protection Grade

**Kevlar Floc** as a composite of mixture rubber and Kevlar fiber, **1.5mm** layer between tread and casing, which improve the rigid of tire and puncture protection. It will be applied in range of city/urban tires.

★★★★☆

Protection Grade

High density **Nylon breaker** will not only keep light weight, but also provide highly puncture protection from glass, debris and other materials with sharp edge.

Kevlar Breaker (K3): High strength of KEVLAR fabric brings with super anti-puncture performance, while minimizing the increment of weight.

**DINO SKIN**  
KEVLAR-3 BREAKER

5mm RUBBER BREAKER  
**RHINO SKIN**

40x40 NYLON BREAKER  
**SHARK SKIN+**

1.5mm KEVLAR® FLOC BREAKER  
**HIPPO SKIN**

NYLON BREAKER  
**SHARK SKIN**

## SIDEWALL PROTECTION

**SPS**(SHARK SKIN protection system on sidewall) present a great cut-resistant performance on sidewall against sharp rocks.

Choose **S+PS**(Shark skin+ Protection System on sidewall), will give you more confidence to ride, through the Rocky terrain, and treacherous trails where the risk of sidewall cuts and abrasions is high. Also very suited for tubeless ready tire conversion. It can save half quantity of sealing liquid, and keep the air pressure longer.

**SPS**  
SHARK SKIN PROTECTION SYSTEM ON SIDEWALL

**S+PS**  
SHARK SKIN + PROTECTION SYSTEM ON SIDEWALL

## BEAD TO BEAD PROTECTION

Based on **SHARK SKIN+** technology, while offers protection from Bead to Bead. This additional all-round puncture protection layer make the casings extremely durable against different damage.

The **Pro** edition of "B to B", keep the same extreme protection for carcass, meanwhile the special rubber inside the carcass layers provides strengthened sidewall to ensure stability during freeride and downhill.

**B to B**  
SHARK SKIN + BEAD TO BEAD

**B to B PRO**  
SHARK SKIN + BEAD TO BEAD BUTYL IN SIDE

## DOWNHILL PROTECTION

Extra butyl rubber offers extra safety and bead anti-puncture ability, to prevent pinch flats at low air pressure, also helps protect rim from hard hits and keep tire beads seat firmly with rim. Especially made for freeride and downhill use.

Dual Ply casing makes our DH/FR tires even tougher and stonger!

**PRO BEAD**  
BUTYL INSERTED REINFORCED BEAD

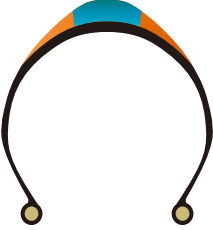

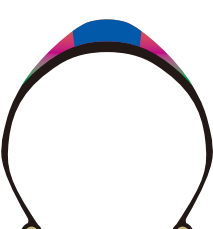

**DUAL DEFENSE**  
DUAL PLY CASING EXTRA DEFENSE

MODEL	PROFILE	HARDNESS	PERFORMANCE
		<div><div></div>SOFT</div> <div><div></div>MEDIUM SOFT</div> <div><div></div>BASE</div>	■ Stabilization base ensures easy riding. Center compound offers fast rolling. Soft shoulder makes grippy performance.
		<div><div></div>SUPER SOFT</div> <div><div></div>MEDIUM SOFT</div> <div><div></div>BASE</div>	■ Perfect balance between 3C-XC and 3C-DH compound. Grippy than XC compound, while provides lower rolling resistance and better treadwear than 3C-DH compound.
		<div><div></div>EXTREMELY SOFT</div> <div><div></div>SUPER SOFT</div> <div><div></div>BASE</div>	■ Stabilization base ensures precise traction. Low rebounding Super soft center and extremely soft shoulder offers ultimate grip and cornering.
		<div><div></div>EXTREMELY SOFT</div> <div><div></div>BASE</div>	■ Extremely soft single 42a hardness compound for DOWNHILL using, super low rebound and high traction performance.
		<div><div></div>MEDIUM</div>	■ Our special super light compound for XC, used in our lightest Merlin series, make you faster and faster, the Sky is no limit.
		<div><div></div>MEDIUM SOFT</div> <div><div></div>SOFT</div>	■ Based on S85 Silica compound, for super fast XC racing, specially used in smooth tread pattern tire, ride in good road condition.
		<div><div></div>SUPER SOFT</div> <div><div></div>MEDIUM SOFT</div>	■ Excellent traction and cornering grip for AM and FR tire.
		<div><div></div>SOFT</div> <div><div></div>BASE 2C</div>	■ Our basic high performance dual compound for mountain tire.

# COMPOUNDS

MODEL	PROFILE	HARDNESS	PERFORMANCE
		<div><div></div>TREAD</div> <div><div></div>SHOULDER</div>	■ Professional racing compound with super grip and lowest rolling resistance performance.
		<div><div></div>TREAD</div> <div><div></div>SHOULDER</div>	■ All condition road racing compound offers excellent grip and low rolling resistance, while provides exceptional tread wear.
		<div><div></div>TREAD</div> <div><div></div>SHOULDER</div>	■ Our performance compound for all condition training use, with ideal durability and grip, usually comes with anti-puncture technology like Shark Skin or Hippo Skin. Extra mileage for extra fun!
		<div><div></div>BASE</div>	■ Economical choice to have a taste of our magical Silica compound.
		<div><div></div>TREAD</div> <div><div></div>COLOR SHOULDER</div>	■ Our high performance dual compound for colorful shoulder road tire.
		<div><div></div>TREAD</div>	■ The E-bike compound is developed especially for E-bike use. It has a low rolling resistance and excellent high speed grip, keeps your safety in fast cornering. The 50km/h compound has even better grip and mileage.

**CHAORYANG**  
TIRES

## XC / MARATHON

## PHANTOM SPEED

29"

■ If you are looking for the fastest option than take Phantom Speed. It's small low center knobs have an excellent rolling resistance combined with aggressive shoulder knobs, you don't have to be afraid of the next corner.

### PHANTOM SPEED

### H-5233/H-5233TR

# PHANTOM DRY

29" 27.5"

■ For your all-round dry conditions choose Phantom Dry. Its medium height tread provides great traction and control under braking. Tight knobs at the center to minimize rolling resistance, open space on the shoulder gives you safety and stability through the corner.

## PHANTOM DRY H-5234/H-5234TR

# PHANTOM WET

29" 27.5"

■ When the weather becomes more unpredictable the Phantom wet is the tire of choice. Higher knobs with more space in between allow for confident cornering in wet and loose conditions. For your all-round the year careless combination put the Phantom wet on the front combined with the Phantom dry on the rear.

## PHANTOM WET H-5235/H-5235TR

MERLIN

- Superlight carcass construction specialized in XC riding.
- Shoulder blocks are enlarged to get better cornering grip, especially on dry surface.
- Dual compound provide lower rolling resistance and better durability.
- Reinforced ribs on the block bases make it stronger and ensure continuously kinetic transmission.
- Equipped with CHAOYANG exclusive Dino Skin (Kevlar) anti-puncture techniques, just throw away your anxiety for flat tires and keep riding!

FALCON

- Center pattern block to bridge reinforcement, improve the tire rigidity, make drivers more indeed,
- Shoulder pattern using ladder depth collocation, when high speed cornering, can body dynamic stability, and thus avoid sliding effect.
- Whole area pattern piece order collocation weight loss, in addition to increase performance grounding more can reduce the tire weight, Mud at the bottom of the stripes match again decorative pattern,provide immediate and effective dredge (soil) effect, prevent dirt block pattern block effect.
- Super lightweight tire body, 26X1.95 ,only 410 g, leading the market almost all of the same style tires, with smaller particles completely smooth decorative pattern design, will effectively reduce the resistance by 15%, dry performance more excellent.

ZIPPERING

- Centerline tread blocks are arranged intersectantly, the densely arranged arc-shaped small blocks, with inverted triangle notches, providing better grip ability and impact damping ability
- Shoulder blocks are 1/3 sparser than centerline part, the combination of these blocks increases adaptability while decreasing the weight. It can be used in various terrains
- All pattern blocks are arranged in V form, and will form big obtuse angles with ground when heading forward, so the tire will have extremely large traction force, especially in cornering condition

EVOLUTION

- Do not worry, your high-speed cornering and precisely response can be ensured by the brand new design of large block side knobs definitely
- The design from our engineer with the center tread not only for excellent braking, optimal steering ability and accelerating, but also minimized rolling resistance

29" 27.5" 26"

HORNET

- Only high speed rolling & stable cornering can be the king of Cyclocross race! Benefitted from its reinforced directional center knobs cooperated with inconsistent in-mid small lugs, you will be capable to master all challenges from sandy or tarmac tracks with its high grip and minimal rolling resistance.

GRAVEL <sup>NEW</sup>

NEW

## GRAVEL AT

■ Gravel AT the allrounder in the Gravel category brings together all the positive attributes to guarantee a worry-free riding on and off road. The directional arrow treads balance rolling resistance and traction and help to vent water and debris. The additional lug on the open designed shoulder strengthens the knobs while cornering. On road or off road this tire can do it all.

700C

## GRAVEL GP

■ The dense arranged knobs in the centre of Gravel GP are designed for a low rolling resistance. The diamond shaped knobs open up direction shoulder to provide cornering grip and help evacuation in rainy conditions. These qualities make the Gravel GP the fastest tire of our Gavel family for on road and dry off road conditions or a perfect rear in combination with Gravel AT or MT.

## GRAVEL MT

■ The Gravel MT is the roughest pattern of the Gravel family and designed for off road use. Numerous solid small blocks provide a stable performance on the brakes and while cornering on gravel roads and trails even in harsh conditions. If you want to explore Mountain Bike terrain with your Gravel Bike the Gravel MT is your choice.

## UNIQUE SILICA COMPOUND FOR ROAD RACING

**TREAD**  
**SHOULDER**

■ Professional racing compound with super grip and lowest rolling resistance performance.

**TREAD**  
**SHOULDER**

■ All condition road rcing compound offers excellent grip and low rolling resistance, while provides exceptional tread wear.

**TREAD**  
**SHOULDER**

■ Our performance compound for all condition training use, with ideal durability and grip, usually comes with anti-puncture technology like Shark Skin or Hippo Skin.  
Extra mileage for extra fun!

**BASE**

■ Economical choice to have a taste of our magical Silica compound.

### ABOUT SILICA TECH

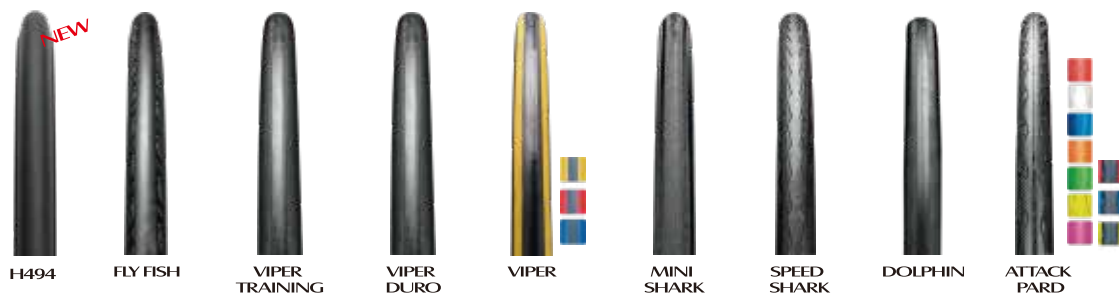

With years of experience in Ultra High Performance car tires, we adapted our unique SILICA technology to bicycle racing tires perfectly.

It is known that better grip comes with higher rolling resistance. Our unique Silica Tech keeps an ideal balance between tire rolling resistance and grip performance.

Silica material effectively reduces friction between rubber atoms, thus lower energy consumption and provides lower rolling resistance.

Tires with our unique Silica Tech compound have soft and flexible tread, which helps enlarge the contact area to boost perfect grip ability.

FLY FISH

- Thanks to the design of special cambered surface in the middle, you'll enjoy an extremely low rolling resistance and comfortable riding experience
- Minor grooves on the shoulder makes cornering more stable and avoid side slipping
- Superlight and high density Kevlar anti-puncture layer give the tire an impressive anti-puncture ability
- The newest compound specially designed to lower the rolling resistance and increase traction force

## SPRINT SHARK

- Contiguous center knobs make this tire ideal for breezily riding due to the effectively minimizing of rolling resistance
- Shallow groove base is capable to prevent the knobs from immature cracking
- Multivariate side knobs offer excellent grip and perfect drainage

700C 26"

## VIPER

- A treadless slick city/urban tire from our road model Viper.
- Besides its fast rolling character, a Shark Skin+ protection is added to assure your riding safety.

700C 29" 27.5"

## SWIFT

- The unique "arge petal" pattern design can not only achieve better visual effects but also increase the riding comfort with enlarged contract surface
- "Lateral" wider rib pattern design on the shoulder can improve the handling while turning
- The better sidewall appearance with small rib pattern
- Streamline pattern groove design can achieve better water traction

SNOW STORM

- Three rows of longitudinal pattern block in tread, direction V design of large dip Angle. Not only can increase the strength of the decorative pattern block, and at the same time easy to cut into the snow and so on soft terrain, and significantly reducing the rolling resistance of riding.
- The triangle arrangement nail, provides tires with strong stability and traction. fast cornering the snow, make you confident.
- 152 spikes.

FAT

BIG DADDY

- Aggressive pattern design combines bionics with cartoon, equipped with super wide carcass, unprecedented overbearing character
- Star pattern in the middle and large inclined angle provides superb supporting force and smooth direction
- 45° arranged star pattern on the shoulder effectively avoid horizontal slip trend, make cornering more stable
- Horizontal blocks ensure an excellent braking force, avoiding slip in sand, grass or snow

## ***SPIKES***

## ***CORTINA***

- Hexagons pattern design and parabola juncture between blocks strengthen the rigidity of casing, and prevent knobs from cracking and improved durability effectively
- Wide opened center and side knobs provide excellent mud and snow clearance
- The diamond pattern design in the center cooperated with unique skid-proof compound system is capable to enlarge contract area between tire surface and floppy snow with providing optimal friction
- Carbide nails are inlayed inside of the tread blocks which will ensure excellent handling, grip and traction while driving on icy roads and ramps
